Performance One Products of the Month

The All-In-One Professional Performance Formula!!

The all-in-one competition formula delivers a power packed Glucosamine, MSM and Creatine combination, along with essential amino acids, anti-oxidants and complete vitamin, trace mineral and electrolyte supplement. This product is ideal for the true equine sport that relies on speed, stamina, recovery and mental focus.

Synergistic ingredients and maximum absorption will affect your horse starting with; **Glucosamine HCL and MSM** are in high enough dosages to provide joint support, HA production, maintain ligament integrity, natural anti-inflammatory properties and strengthen the respiratory system.

Creatine – Enhances muscle development by pulling water to the muscle and increasing volume and power. It will also increase the length of maximum power output and decrease ammonia and lactic acid levels.

DMG – helps to break down lactic acid in the muscle which will help to keep the body from muscle fatigue and cramping. It will also oxygenate body tissue and boost immune system.

Full vitamin/mineral – Chelated Minerals are used for better absorption and well rounded to provide optimum overall health and balance the mind.

Electrolytes – ensures the valuable trace minerals, potassium, calcium, magnesium, sodium and phosphorous are replenished during training. Decreases instances of tying up due to muscle cramping and digestive issues.

Chromium Yeast - The added assurance that the stomach is being looked after.

This all-in-one formula simplifies your supplement program by covering all the bases. It increases power, speed and recovery all in ½ to one scoop per feeding. It is a very effective drug free approach to increase your performance and maintain optimal health.

NOTE* - You can increase or decrease dosage to your own horses specific needs. Do not feed with any other vitamin mineral supplement but you can add loose salt to your feed if needed. Recommended maximum serving is 1 scoop twice daily. Do not feed full training dosage to pregnant or lactating mares, stall rested or horses who not training at least 5 days

Great News regarding PROTOCOL GMB
- Our Human Arthritic Pain Relief Formula -

After 4 years of applying, our Protocol GMB, a formula to relieve our own joint pain associated with osteoarthritis, has been granted a Natural Health Product Number (NPN) by Health Canada.

Re: Product License Issuance - NPN 80029787 - Product: Protocol GMB

The Natural Health Products Directorate (NHPD) has concluded that the product is in compliance pursuant to section 7 of the *Natural Health Products Regulations*.

You will be seeing the NPN number on the GMB Labels along with the following statements we can now legally claim: ***This formula has been shown to be a factor in maintaining healthy cartilage and connective tissue formation. GMB helps to relieve joint pain associated with osteoarthritis and helps in the development and maintenance of bones***

GMB will be available in the following:

380 gm Powder (with spoon) - Suggested Retail \$32.95

600 gm Powder (with spoon) - Suggested Retail \$54.95

180 Veggie Gel Capsules - Suggested Retail \$32.95

Spread the News – Relief is Spelled G-M-B!

Medicinal Ingredients – per 5.6 grams – daily dose:

Glucosamine Hydrochloride (GHCL) 1904 mg / scoop or 7 capsules

Methylsulfonylmethane (MSM) 1540 mg

Glycine (essential amino acid) 1400 mg

Vitamin C /buffered (Calcium Ascorbate) 490 mg

Calcium (Calcium Ascorbate) 56 mg

The contents of this product are free of fillers, artificial flavours, preservatives, caffeine or other stimulants. GMB is **FREE of the common allergens found in:** wheat, milk, soy, soya, yeast, corn, citrus and egg.

GMB is manufactured in a **GMP Registered facility**. Each production batch is independently tested for purity and known contaminants. **Certificate of Analysis** (CofA's) are available for each ingredient in all products offered by SciencePure Nutraceuticals Inc.
